

If your main television program source is a cable or satellite box, you probably use the cable/satellite remote control for channel and volume adjustment. After following the steps outlined in this guide, you can continue to use your cable/satellite remote control to adjust the volume output from the ZVOX system.

Your Current TV Remote Can Control Your ZVOX System.

The steps involve pressing the Volume, Mute, and Power buttons of your favored remote control with it positioned close to the control panel of the ZVOX Sytem. The ZVOX system allows these new commands to adjust Volume, Mute and Power. To insure accuracy, the ZVOX Learning routine records each button's infrared signal twice, then confirms a successful recording.

PREPARE

1

Sit within easy reach of the ZVOX system's front control panel.

You will need to press two buttons on the ZVOX system front panel to start the learning process, then press four remote control buttons.

PREPARE

2

Locate the following buttons on your remote control:

- 1 VOLUME UP
- 2 VOLUME DOWN
- 3 MUTE
- 4 POWER

The learning process involves pressing these four buttons in sequence.

This remote is only an example. Your remote is probably different. Please locate these buttons on your remote.

PREPARE

3

Press both ZVOX system VOLUME buttons until "Lrn" appears (about 4 seconds). Then release both VOLUME buttons.

- Get ready to press VOLUME UP on the Remote Control.

Error Message Of the ZVOX Learning Routine

If you see the "no change" message (noch) during the learning routine, the ZVOX system did not accept the infrared code. The current step in the learning routine will repeat.

Learn Button

1

volume up

When **UP 1** appears, press VOLUME UP for 1 second.

You should see **----**

When **r-EP** appears, press VOLUME UP for 1 second, again.

You should see **----**, followed by **Good**.

Learn Button

2

volume down

When **dn 2** appears, press VOLUME DOWN for 1 second.

You should see **----**

When **r-EP** appears, press VOLUME DOWN for 1 second, again.

You should see **----**, followed by **Good**.

Learn Button

3

mute

When **M 3** appears, press MUTE for 1 second.

You should see **----**

When **r-EP** appears, press MUTE for 1 second, again.

You should see **----**, followed by **Good**.

Learn Button

4

power

When **Pr 4** appears, press POWER for 1 second.

You should see **----**

When **r-EP** appears, press POWER for 1 second, again.

You should see **----**, followed by **Good**.

..... YOU ARE DONE!

You Probably Don't Need To Read This!

Special Instructions in case:

- 1 Your TV has no "internal speakers OFF" function
- 2 You would like to defeat the Automatic Standby function
- 3 Your preferred remote still does not control your ZVOX

Teaching the ZVOX system to respond to your current remote:

Alternate Methods

Problem: Your preferred remote control does not control the volume on the ZVOX Audio system after using the "Learn Remote" procedure described on the other side of this sheet.

Solutions: Consult the "Unused Brand" Control Instructions below. Or consult the last panel of the User Manual for additional advice.

Problem: After teaching the ZVOX system to respond to the Cable/Sat remote, both the ZVOX system and the TV speakers are heard. The TV speakers do not sound good and may not synchronize with the ZVOX system sound.

Solutions:

1

Turn off the TV speakers using the on-screen menu choice offered on most TVs. Not all TVs have this feature.

OR

2

If the cable or satellite box connects to the TV using HDMI:

Re-configure your Cable/Sat remote (by using the Cable/Sat remote's "restore defaults" capability) to "unlock" its Volume buttons. Set the Cable/Sat remote to "set top box" control mode (not "TV" control mode). The Cable/Sat remote will now send out volume commands that do not affect the TV speakers.

Repeat the "ZVOX Learning Routine" procedure.

OR

3

If neither of the first two solutions apply to your system, you can use the "Unused Brand" solution. You change the "TV" section of your Cable/Sat remote and the ZVOX system to use remote commands that don't affect your TV's volume control—an "unused brand". This method will work no matter which brand TV or Cable/Sat remote you have.

"Unused Brand" Control Instructions

The ZVOX system can be set to respond to the remote volume commands for one of the following brands: Sony, LG, Samsung, Vizio and Panasonic. It is likely your Cable/Sat remote control will be able to send the Volume commands of the TV brand you select as the ZVOX system control brand.

Configure the ZVOX system to respond to one of the five brands. Use the pictures below as a guide. Just be sure it is NOT the brand of your TV, DVD/Bluray player or other audio/video component in your TV system.

Consult your Cable/Sat remote "Brand and Code" listing. Look for control codes for the brand you selected for the ZVOX system. There may be several. Follow the Cable/Sat remote instructions for entering a code number. We suggest you apply the number to the "Aux" or "Audio" button on your Cable/Sat remote. You should be able to find a control code that adjusts the volume and mute of the ZVOX system. You may have to try a second brand if the first brand you choose doesn't work.

After you have found a control code that adjusts the volume on the ZVOX system, we suggest you use your Cable/Sat remote control's "Volume Lock" feature. This forces the remote volume buttons to adjust the ZVOX system, independent of the Cable/Sat remote "operation mode": Set-top box/TV/DVD/Aux.

Press both buttons to start the "Choose Brand" function.

Press the Volume Up button to select a different setting. The new setting is stored when the display turns off.

PS-0 Learned Commands

PS-1 Sony

PS-2 LG

PS-3 Samsung

PS-4 Vizio

PS-5 Panasonic

If your first choice of brand on the ZVOX system does not work, repeat the procedure using a different choice of brand.

Automatic Standby Operation: Turning Standby On and Off.

A ZVOX system arrives with Automatic Standby operation "on" by default. A ZVOX system will enter Standby after 25-30 minutes of audio signal silence. A press of the **VOLUME**, **MUTE** or **POWER** buttons on the ZVOX remote control will turn the ZVOX back on.

With some home TV installations, the available audio signal level may be quite low. In this case, Automatic Standby may be triggered while you are watching a TV program. If this occurs, it is recommended that the Automatic Standby be turned off.

To turn off Automatic Standby:

- 1 Switch the ZVOX system's rear panel **POWER** switch to the OFF position.
- 2 Press and hold down the **MUTE** button on the ZVOX system front panel (not the **MUTE** button on the ZVOX remote control).
- 3 While holding down the **MUTE** button, flip the rear panel **POWER** switch to the ON position. Continue to hold down the front panel **MUTE** button until the display shows "noAS" (indicating Automatic Standby operation has been turned off). Then release the MUTE button.

After completing step 3, the ZVOX system will stay on until the **POWER** button on the remote is pressed. You can also turn off the ZVOX by pressing the **MUTE** button on the front panel for longer than 4 seconds.

- 4 You can restore Automatic Standby operation by repeating steps 1 through 3. In this case, the display will show "AS" (indicating Automatic Standby operation has been restored).
